## Safety and personal protection products

We have safety devices and machines that make your school workshop safe.

*Ejca Maskin AB, founded in 1943, is a specialist Swedish company in the wood working machinery sector. Feel free to call us if you would like further information or references. You can also read about the machines and accessories on our website.*

### Machine cover TS-60

EJCA TSL30

Machine cover with hardened glass, lathe cover Bohuskåpa. The cover, made of heavy plate with specially hardened glass, is easy to manoeuvre thanks to a lockable gas spring.

Dust- and spray-proof lighting for the cover, two machine covers and a limit switch (left-hand cover) are included as standard. The cover can also be ordered individually for smaller lathes.

#### Technical specifications

Dimensions, sighting panel: 285 x 285 mm  
Material: Steel frame, hardened glass  
Voltage, lamp: 230V  
Enclosure classification: IP66

#### Article

100067: Complete lathe cover, Bohuskåpa, with a machine cover left and right, including lighting.  
100161: Complete lathe cover, Bohuskåpan, with a machine cover left or right, including lighting.  
100139: Machine cover left or right with lighting for retrofitting to an existing Bohuskåpa.  
1100164: Machine cover left and right with lighting for retrofitting to an existing Bohuskåpa.  
100133: Limit switch.

### Safety hood CHO 40

EJCA L-18

Safety hood CHO 40 for circular saws is fitted with a sighting glass, inbuilt working lighting, sleeve coupling for a dust extractor and a roller at the front edge of the hood. The sighting glass and halogen lamp are easily accessible for cleaning and replacement.

When sawing using an angled saw blade the right-hand side plate can be easily replaced by a wider cover which is provided. A special pusher for narrow workpieces is fitted to the right-hand side of the cover.

The safety hood comes with parallel struts and bottom plate and with the mounting kit provided it fits most circular saws.

#### Technical specifications

Fits saw blade diameter, max: 499 mm  
Extraction sleeve coupling, diameter: 60 mm  
Halogen lamp: 12V/20W  
Power: 220V/11W

## Machine guard TR-6

Machine guard TR-6 for a vertical drilling machine. The frame is made of steel with protective polycarbonate glass. Easy to assemble. Adjustable height. Equipped with a microswitch to prevent the machine from being started when the guard is not in place.

Technical specifications  
Dimensions, protective glass: 130 x 200 mm  
Material: Steel frame, polycarbonate glass

## Cutter guard

EJCA L38 310

The EJCA Cutter guard can be fitted to the majority of planers and thicknessers on the market. All that is required is to drill into the table and attach the bottom plate with screws. The cutter guard is supplied complete with galvanised parallel struts and bottom plate and a locking lever.

Technical specifications  
Parallel arms: Galvanised metal tubing  
Safety guard: varnished wood

The article illustrated is suitable for a 310 mm cutter.  
Also available for large and small machines.

## Safety gate 48-85231

EJCA BS 50

With the EJCA Safety guard you have a safety area around the machine to protect both you and your pupils and at the same time the gate supports the material. The safetyguard can be folded and is easily fitted to the machine table with screws. Fits the majority of bandsaws on the market.

Technical specifications  
Powder coated steel
